To Whom It May Concern

We would like to say how satisfied we have been with all the projects Natural Habitat have undertaken for Williams Estates Ltd.

They have completed several projects in two gardens undertaking several difficult areas efficiently and safely. The 25-acre garden had a patio re-designed, some ancient trees replaced and a wild meadow planted leading to a lake. The driveway was re-surfaced and included automatic gates.

The other urban garden had flintstones walls re-built and several areas re-designed with fencing camouflaged by tasteful planting of shrubs.

Natural Habitat undertook all the projects in a well organised manner, offering guidance, expert advice and always leaving the site clean and safe each evening.

Great care was taken to ensure minimal disruption and all projects finished on time and within budget. Their service was pleasant, efficient and safe.

We would highly recommend Natural Habitat to anyone considering any projects and we will definitely be using them again

Yours faithfully

Edna Sugarman
Director
Williams Estates Ltd
